

PAYER

#### INDUSTRY & FUNCTIONALITY

Reagent packs for handling liquids in various in vitro diagnostic analyzers.

## REQUIREMENTS & CAPABILITIES

- Requirement management (ISO, FDA, customer and country specific)
- Interface management
- Qualified equipment and proven processes
- Consideration of scale up from project initiation onwards
- Global footprint production
- Manual and semiautomated assembly
- Total management of global supplier base

## DIFFERENT CHALLENGES

- Coordinating different processes at different prescribed suppliers was managed
- Several material changes had to be made as several raw materials were discontinued

## TECHNOLOGY & PROCESS

- Transfer of production and test equipment from former supplier to PAYER
- Tool making
- Optimization of the system
- Development of new production and test equipment
- Ultrasonic welding at PAYER

# Reagent PACK

#### PRODUCT DESCRIPTION

Reagent packs dispensing fluids distribution for automated quality controls in blood gas and electrolyte analyzers.
